

Question about Feedback provided by the reviewer?

Dong Z over 1 year ago

I submitted my movie tableau project with word document including screenshots attached and received a feedback regarding " To validate this requirement, provide written answers which are clear and written in full sentences, the Step 3 section with not more than 500 words and references in the write up to visualizations are clear and easy to follow. " What does this mean? Do you mean I need to write a paragraph to address each question in word document and following with visualization screenshots below for each question?

For each visualization screenshot in the report, you should follow it with the findings and insight you gained from these visualization, or as you said, the answers for question you've generated. You can include all findings in one section and named it (Summary).

Hope this is helped.

Wish you all the best in your resubmission.
